New in winter 2011: Type Y – Yucon

Yucon is the design innovation of the AUTEC winter program 2011. The wheel has an aggressive and dynamic character thanks to its gently curved spoke structure and the distinctive contours in the central area. The new and innovative finish in titanium silver underlines the sportiness of the wheel.

Type Y is available with ABE in 6,5 x 15 for numerous vehicles, with 5-hole mountings.
