

Dr. Hans-Uwe Berger

### **Technical department under new direction**

On April 1<sup>st</sup> Dr. Hans-Uwe Berger took over the direction of the technical department of the AUTEC GmbH & Co. KG and is responsible for the design and construction of light alloy wheels from this date on.

Dr. Berger studied Mechanical Engineering at the Technical University in Darmstadt and did a PhD at the University of Canterbury (New Zealand). After being an assistant lecturer in dynamics at the University in Christchurch Dr. Berger worked for the consulting company EnginSoft and was in charge of the technical sales of CAE software.

The 32 year-old engineer is an adept of the wheel industry: already as a teenager he helped out in the parental company, the BCW Kraftfahrzeugtechnik GmbH, as well as the SRF Südrad Roues France S.A. and took part in trade fairs and business trips to wheel manufacturers.

AUTECs CEO Bernhard Ellerböck is happy to welcome a new team member and is convinced that the AUTEC GmbH & Co. KG will benefit from Dr. Berger's industry and technical knowledge.
