

### **AUTEC's new catalogues are now available!**

Just in time for the coming spring season AUTEC presents its new catalogues! They were made over completely and are now more modern, clearer and fresher than ever!

The wheel program with its detailed application list was better arranged and is the optimum basis for dealers to advise their customers professionally and individually. The design program addresses to end customers and shows the design collection in a structured and demonstrative way.

Of course the new sales manuals also inform about AUTEC's innovations – the new wheel designs "los" and Limit black" are special highlights in this year's spring collection.

You can download the new catalogues in the download area of the website [www.autec-wheels.de](http://www.autec-wheels.de).
