## AUTEC presents its design program for winter 2009

AUTEC's winter catalogues 2009 are now available!

The Wheel Collection addresses to AUTEC's distribution partners and serves as a basis for a competent sales talk. Besides a demonstrative presentation of all winter designs, the Wheel Collection also provides an extensive application list with detailed information about ABE or TÜV tyre recommendations and snow chain releases.

The Design Collection is a handy information brochure for end customers and shows all actual winter designs.

New in this season is the fact that both catalogues are bilingual. In order to meet the requirements of the increasing amount of foreign customers, the Wheel and Design Collection are written in German AND English language now.

Of course the new program emphasizes AUTEC's new wheel design "Zenit". The wheel is available with surfaces in brilliant silver and matt anthracite. It impresses with its distinctive paintings and a clear and sportive design.

The winter catalogues are sent to every AUTEC dealer free of charge. You can also download them via [www.autec-wheels.de/kataloge1](http://www.autec-wheels.de/kataloge1).
