AUTEC's wheel type T has a wide range of applications

AUTEC's first wheel for light trucks – type T (Talos) – complements the AUTEC design program for a short time.

Talos convinces with a high wheel load and a wide range of applications. It was designed especially for the following light trucks (with 5-hole mountings):

Mercedes Sprinter, Ford Transit, Renault Master, Peugeot Boxer, Fiat Ducato, Citroën Jumper, Volkswagen LT, Nissan Interstar and Opel Movano.

Type T is very user-friendly as the serial bolts of the particular vehicles can be applied. Furthermore the wheel is available with ABE – without rework – for almost all vehicles.

Massive spokes, a striking central area and a dynamic appearance mark the dominant character of the wheel. The painting in brilliant silver gives Talos an individual touch.
