NEW in AUTEC's design collection: Type Z (Zenit) and type Za (Zenit anthracite)

"Zenit" is the name of AUTEC's new and innovative wheel design, which adds AUTEC's design collection a very special highlight.

The appearance of the Z-wheel is characterized by seven externally connected spokes with defined contours that lead elegantly into an interesting central area.

Zenit is available with surfaces in brilliant silver painted (type Z) and in anthracite matt painted (type Za). The finish in brilliant silver emphasizes the attractive wheel design, whereas the matt painting in anthracite gives the wheel a special classiness.

Zenit is available with ABE for almost all vehicles, with 4- and 5-hole mountings.
